**Summary: This concept paper specifically proposes the Colorado Health Outcomes Measurement & Evaluation Consortium (CO-HOME) – a system to ensure the medical home standards, quality measurement and improvement systems that any comprehensive proposal should include to ensure financially viable, sustainable, and fair access to high quality, cost-effective, and coordinated care for all Coloradans. It will be available on 3/19/2007 to be used entirely or in part by any entity wishing to incorporate it into a complete 208 proposal.**
